## Acknowledgements

*The preparation of a general plan is often a pivotal event in a community's development. Not only because of the importance of the plan relative to the physical growth and development of the community, but also because the intense public involvement process often galvanizes and motivates citizens to become actively engaged in planning for their community. When the process works, the end result is a plan, which is relevant, insightful and prudent, coupled with a group of citizens committed to sound planning principles and articulately involved in the future affairs of their community. Hopefully, the Pinetop-Lakeside/Navajo County Regional Plan will meet these aspirations. Without question, the planning process generated vibrant and thought-provoking participation on the part of many citizens. Their contribution, and the contributions of those listed below, have been instrumental in the development of this plan. Their efforts are gratefully acknowledged.*
